To: SJVAPCD (Permit Services) & Applicable Engine Permit Holders
From: Joey Mier, MurCal-VP of Sales & Business Development
RE: SNGEC System Installation Approval for **Quinn Power Systems**.

This letter should serve notice that **Quinn Power Systems** has completed the MurCal SNGEC System training program as of 7/23/15. The topics reviewed and discussed include but are not limited to the following:

- Basic SNGEC System function and operation
- Installation procedure for each component of the SNGEC System
- Calibration procedure for the AFR controller
- Adjustment or recalibration procedure for the AFR controller
- Routine maintenance procedure for the AFR controller and catalyst
- Troubleshooting procedures
- SNGEC System warranty information

Additionally, MurCal has provided **Quinn Power Systems** with all applicable SNGEC System documentation for proper installation, operation, troubleshooting, and repair & maintenance of the SNGEC System and the individual components. The documentation distributed includes the following:

- Compliance Controls AFR Controller Operation Manuals
- Johnson Matthey NSCR 3-Way Catalyst Overview & Operation Guidelines
- SJVAPCD Operational Guidelines for Rich Burn Certified Engine Emissions Control Systems
- SJVAPCD PEER Application and ATC
- MurCal SNGEC System Certification Letter
- New Site Qualifications
 - Checklist
 - Procedure

Sales, Service, and Installation for Engine Instrumentation, Control, and Emission Compliance.
