RE: SNGEC System Installation Approval for **Valley Power Systems**

This letter should serve notice that **Valley Power Systems** has completed the MurCal SNGEC System training program as of 05/06/16. The topics reviewed and discussed include but are not limited to the following:

- Basic SNGEC System function and operation
- Installation procedure for each component of the SNGEC System
- Calibration procedure for the AFR controller
- Adjustment or recalibration procedure for the AFR controller
- Routine maintenance procedure for the AFR controller and catalyst
- Troubleshooting procedures
- SNGEC System warranty information

Additionally, MurCal has provided **Valley Power Systems** with all applicable SNGEC System documentation for proper installation, operation, troubleshooting, and repair & maintenance of the SNGEC System and the individual components. The documentation distributed includes the following:

- Compliance Controls AFR Controller Operation Manuals
- Johnson Matthey NSCR 3-Way Catalyst Overview & Operation Guidelines
- SJVAPCD Operational Guidelines for Rich Burn Certified Engine Emissions Control Systems
- SJVAPCD PEER Application and ATC
- MurCal SNGEC System Certification Letter
- New Site Qualifications
 - Checklist
 - Procedure

Sales and Service for Engine Instrumentation, Control, and Emission Compliance.

The MurCal SNGEC System Installer Certification process encompasses two types of training. The first portion of this training consists of a classroom type workshop. This workshop will introduce the SNGEC System in full and will educate each attendee on all aspects related to the proper installation and operation of the system. The second portion of training will include an on site inspection during the installation process by a MurCal representative during the first THREE installations for each company applying for System Installation Certification.

Please contact MurCal with any questions or concerns regarding any of this information or the Installer Certification process in general. Further documentation and training is available upon request.

Respectfully,

Joey Mier, MurCal-VP of Sales & Business Development
