

P/Q600 Solenoid

“P600 (pull type) and Q600 (push type) are built to withstand high temperature and high vibration environments.”

P/Q600 Solenoids are available in a variety of base sizes with a number of boot options to provide environmental protection. We'll build them how you need them – Trombetta can customize the P/Q600 Solenoids to meet specific requirements. P/Q600 options include various voltages, mounts, rods, boots, spring returns, connectors and plunger surface finishes.

P/Q600 Solenoids are often used for throttle control and fuel shutdown applications and can often be found in mobile and stationary equipment, including lawn and garden equipment, compressors, generators, and construction equipment.
